Simberian News: January 29, 2024

After four years of intensive development, **Simberian is back at [DesignCon 2024](#) with Simbeor, the universal electromagnetic signal integrity software for PCB and packaging interconnects**.

Here are some highlights of the latest Simbeor releases:
• Fast and easy, interactive or automated compliance verification of PCB interconnects for various industry standards, such as IEEE, OIF, PCI Express, etc.
• Accurate and efficient electromagnetic analysis of interconnect up to 224 Gbps, accelerated with the domain decomposition and network and cloud computing.
• Unique SI interconnect compliance analysis interface for pre-layout, post-layout and multi-board verification that works for both experienced SI practitioners and PCB designers without SI background.

Don't miss this opportunity to see Simbeor in action at booth #901 and learn how it can improve your design. In particular, we will demonstrate new **pre-layout and multi-board capabilities of SI Compliance Analyzer** and new tool **Compliance Browser, to browse the compliance validation results and generate compliance reports**. All new features will be part of Simbeor 2023.02 release that will be available for customers and trials in the second half of February, 2024.

If you have any feedback or questions, please do not hesitate to contact us at info@simberian.com. We are always happy to hear from you and assist you.

Thank you for choosing Simbeor – **Be the SI Expert!**

Sincerely,
Team Simberian
