...from Simberian Inc.

Welcome to the latest edition of Simberian News!

Simbeor 2011.03 is now available...

We would like to announce that after getting feedback from our customers we made substantial enhancements in our DesignVision award-winning Simbeor electromagnetic signal integrity software and released version 2011.03. Updated Simbeor has improved usability and algorithms that further increase productivity of signal integrity engineers. [It can be immediately downloaded from our web site.](#)

[A complete list of improvements in the update release is available here.](#) **Touchstone Analyzer™** tool has been substantially improved – see new capabilities in demo-video [#2011_03](#) (some existing functionality is also featured in [#2011_01](#)). **Rational Compactor™** tool has been enhanced with new automatic algorithm to find the best macro-model possible. Some improvements in stackup exploration and design verification flow are illustrated in demo-video [#2011_02](#).

We are also happy to announce that [Polar Instruments Asia Pacific Pte. Ltd](#) will distribute and provide local support for Simbeor software in Asia-Pacific region.

Validate your analysis with measurements and your measurements with analysis! We keep working with our customers and partners on measurement validation projects. The results of two recent and ongoing projects on nickel and roughness characterization up to 50 GHz will be reported at upcoming [IEEE International Symposium on EMC](#). Simbeor simply beats the competition when it comes to validation with measurements.

[Download and try Simbeor today](#), or let us know if you would like to have an overview and demo of Simbeor at your company site or over the internet. For more information on product pricing and availability, contact Simberian at info@simberian.com.

Sincerely,
Team Simberian
