

## Simberian News: September 18, 2018

«GreetingLine»

Here is an update on what is new at Simberian: **(1) Production release of Simbeor THz 2018 is now available; (2) The first version of Simbeor SDK with API in C is now available; (3) Upcoming webinar on “How to design predictable interconnects”.**

**(1) Production version of Simbeor THz release 2018.01** is now available for customers and evaluation at [downloads section](#) together with “What is new in Simbeor THz – Release 2018.01” document. Description of new features and how to use them is [also available here](#).

**(2) Simbeor SDK with API in C** is now available at [downloads section](#). Simbeor SDK can be used for design automation (analysis, geometry synthesis, material model identification), for machine learning applications (teaching or complimenting machine learning algorithms) and as a simulation component in other EDA software. [Here is how to get started...](#)

**(3) Learn how to design predictable PCB and packaging interconnects for 28-56 Gbps signals** at the upcoming webinar to be presented by Marko Marin from Infinera and Yuriy Shlepnev from Simberian on September 26, 2018 at 10 AM Pacific Time. [Click here to see more information and to sign up](#).
