...from Simberian Inc.

Welcome to the latest edition of Simberian News!

Simbeor 2013.02 with Board Analyzer is available...

We are happy to announce that **Simbeor 2013.02 with Board Analyzer** is now available for our customers and for evaluation.

Board Analyzer (BA) is developed to facilitate unique post-layout decompositional electromagnetic analysis in Simbeor and has the following features:

- Board design import from Allegro brd or mcm, ODB++, HyperLynx hyp and PADS ASCII files;
- Complete board view and graphical net selection and decomposition of interconnects for the analysis;
- Modifications of board design to match manufactured geometry;
- Selection of solvers with analysis options setup within BA;
- Internal and external EM model reuse to accelerate the analysis and improve accuracy;

Brief overview of Board Analyzer features is available here. To get started with Board Analyzer, see [demo-video #2013_01](#) or follow instructions in Board Analyzer chapter of Simbeor Manual ([available here in html or pdf formats](#)).

[Click here to see what else is updated in Simbeor 2013.02.](#)

[Description of new features in Simbeor 2013.01 update is also available here.](#)

If you did not check out our **App Notes section** in a while, it has a few new papers and presentations uploaded recently. Elements of design success are covered in app notes #2013_03 and #2013_05. App note #2013_06 shares some design insights from electromagnetic analysis of interconnects.

Simbeor 2013.02 is available immediately. Just download the installer, install it into suggested directory and follow the instruction to obtain your term or evaluation license (do not install it over Simbeor 2012).

Happy Holidays from Team Simberian!
